

Why do solar panels need maintenance?

Regular maintenance helps keep the panels in good condition so they can generate energy to their full potential. Over time, natural surroundings can have an impact on the performance of solar panels. Dust, leaves, animal droppings and other debris can gather on the panels and reduce their efficiency.

What are the best practices for servicing and repairs of solar panels?

To ensure the efficient operation of solar panels, here are some best practices for servicing and repairs: Regular cleaning: Periodic cleaning of solar panels, particularly in dusty or polluted environments, helps maintain optimal performance. Use soft brushes or sponges and gentle cleaning solutions to avoid scratching the panel surface.

Why is solar panel servicing important?

Solar panel servicing is essential to maximize the energy production and efficiency of the system. It ensures that your solar system generates the electric bill savings that your solar company promised you. Regular maintenance ensures the panels are clean, debris-free, and operating at their peak performance levels.

How often do solar panels need service?

Most solar panels have a lifespan of 25-30 years, which means that in this time they'll need five to six services - if done every five years, solar maintenance could cost you about \$2,000 over the lifetime of your system.

Who can service my solar panels?

Do solar panels require periodic maintenance?

To ensure optimal performance and longevity of solar systems, periodic maintenance is important but often overlooked. Proper maintenance preserves system efficiency, prevents costly repairs, and prolongs the lifespan of solar panels, inverters, and other components.

How much does solar maintenance cost?

Additional costs may occur if repairs are required though. Most solar panels have a lifespan of 25-30 years, which means that in this time they'll need five to six services - if done every five years, solar maintenance could cost you about \$2,000 over the lifetime of your system.
