How can aerothermal heat pump & photovoltaic systems reduce energy consumption?

Combine an aerothermal heat pump with photovoltaic systems to almost eliminate energy consumption in your home or business. Use the clean energy from your solar panels efficiently and sustainably. By charging with solar energy,you are using two key technologies for the energy transition.

How can a photovoltaic solar system help you achieve energy independence?

Set your course toward energy independence! Install a photovoltaic solar energy system for self-consumptionthat allows you to produce and use your own energy,reducing what you consume from the electrical grid,even if you're connected to the supply grid and have an active contract with an electricity company.

Why should you use solar energy in your home?

By charging with solar energy,you are using two key technologies for the energy transition. With a home charging station,you can charge slowly overnight,extending your battery's lifespan. Make intelligent energy management. The best way to use solar energy is to consume it when it is produced.
