

How can I use solar energy in Minnesota?

Get educated: Solar can generate electricity, heat water, or help heat your home. Making electricity is the most common use of solar energy in Minnesota today. Learn about solar through sources such as the Clean Energy Resource Teams (CERTs) and the U.S. Department of Energy (DOE). Take a class on solar basics.

Is solar power a good option in Minnesota?

Generally speaking, solar power is well-accepted in Minnesota, along with other renewable energy sources. The state is relatively environmentally conscious, with a Renewable Portfolio Standard (RPS) goal of producing around 26% of its energy production via clean energy sources by 2025.

How much solar power does Minnesota have?

Minnesota reached a milestone of 505 megawatts (MW) of known grid-tied solar photovoltaic (PV) capacity on July 1, 2017, more than double the state's total capacity of 246 MW on Dec. 31, 2016 and up from just 37 MW in 2015 and up from less than 1 MW in 2009. In the first half of 2017, Minnesota added 259 MW of solar capacity.

How much does solar cost in Minnesota?

Prices range from \$30,403 to \$41,133, but after the federal tax credit, that drops by 30%, and Minnesota has some local incentives as well. While this may sound high, going solar will pay off in Minnesota. That's why over 18,000 Minnesota homeowners have used EnergySage to receive and compare quotes for solar installations.

Where can I find information about solar energy in Minnesota?

Minnesota Department of Commerce, Energy Information Center ([mn.gov/commerce](http://mn.gov/commerce)): Provides unbiased general information about solar energy in Minnesota (800-657-3710); includes a solar-help resource ([solar.help@state.mn.us](mailto:solar.help@state.mn.us)) to answer solar questions.

How many solar jobs are there in Minnesota?

Each MW of solar PV installed in Minnesota supports 13 installation jobs. Based on the funding committed by the Minnesota Department of Commerce through the Made in Minnesota Solar Incentive Program from 2013-2017, an estimated 495 jobs were supported or created in the solar industry in Minnesota.
