

Can I split the cost of solar panels into manageable monthly payments?

Through our partnership with DivideBuy, you can now split the cost of solar panels into manageable monthly payments. We can connect you with DivideBuy, who can arrange interest free loans over terms of 1, 2 and 3 years. Or over 5 or 7 years at a fixed interest rate of 9.9% APR.

How do I pay for solar panels?

You can pay for solar panels using personal home improvement loans, cash-out refinancing, home equity loans, and Home Equity Line of Credit. These options will often have higher interest rates, lower origination fees, and shorter term lengths than solar-specific loans and may use your home as collateral.

Should you buy a solar system or pay off a mortgage?

When deciding how to pay for solar panels, you have two main options: buying the system outright or financing it. With a cash purchase, you buy your system for its full cost upfront and have no payments moving forward. Alternatively, a solar loan requires fixed monthly payments over a term of five to 25 years, similar to financing a car or paying off a mortgage.

Should you pay cash for solar panels?

Paying cash for solar panels is an excellent idea for people with a good deal of savings who pay a fairly large federal tax every year. They can claim 30% of the costs to install solar panels on their next year's tax return and start recouping the cost of their solar investment using energy bill savings from day one.

How much do solar panels cost?

The average solar panel installation will work out to about \$3 per watt. Many factors will impact a system's cost, like the size, equipment used, and installer. No matter how you cut it, solar is a high-priced investment. Luckily, you can finance a solar installation in several ways.
