

Does New York have a solar system?

In New York, the sun shines for everyone. New York State is making solar energy more accessible to homes, businesses, and communities through NY-Sun incentives and a network of qualified installers.

Is New York a good state for solar energy?

Despite receiving less sunlight than much of the country, New York State is one of the leaders in residential solar adoption and ranks sixth for projected growth over the next 5 years. This is largely due to the state having some of the highest electricity prices and arguably the best solar incentives.

Is it a good time to go solar in New York?

New York State is making solar energy more accessible to homes, businesses, and communities through NY-Sun incentives and a network of qualified installers. Combined with declining equipment costs, New York State tax credits, and Inflation Reduction Act tax credits, there's never been a better time to go solar.

How many solar projects are there in New York?

New York is home to more than 800 community solar projects and leads the U.S. in community solar capacity. Statewide, New York's solar energy development is driving economic growth and employing more than 14,000 workers in a variety of solar energy careers.

Can New Yorkers save money with solar energy?

All New Yorkers can save with renewable energy from the sun. Whether you own or rent your home, live in an apartment, house, or condo, have an older home or a brand-new build, there's an affordable way to power your home with solar energy. Ready to get started? Rooftop solar is the most common option for on-site solar installations.

Does New York offer solar incentives?

The state offers solar incentives to encourage residents to convert to renewable energy. Two of its top incentives, an equipment tax credit and net metering, help lower installation costs and offer additional savings over time. We researched local and state New York incentives as well as federal options.
