

Can a nonprofit use solar energy?

Most nonprofits are committed to green energy, and solar installation is one way to achieve that. Using solar energy reduces your organization's carbon footprint. Considering that now you'll be using renewable energy, you'll reduce your dependence on fossil fuel energy. Solar battery storage ensures you have a reliable backup source of power.

Should you switch to solar energy as a nonprofit?

Some advantages of switching to solar energy as a nonprofit include the following: The goal of all nonprofits is to help the community. And to achieve that mission, they will need electricity to run operations. Depending on the organization's size, you'll find that electricity costs are a huge part of your utility bill.

Are solar panels for nonprofit organizations a good idea?

In addition, a quality solar energy system can last up to 30 years, which ensures you get a return on your investment. This makes solar panels for nonprofit organizations a great idea. And now more than ever, solar ownership has become easier thanks to tax credit opportunities, solar leases, and Power Purchase Agreements (PPAs).

How can nonprofits save money on solar?

REvolv is another organization devoted to making solar more accessible for nonprofits through innovative financing solutions. Its model, called the Solar Seed Fund, allows nonprofits to save 15% on their electricity bills through a solar PPA or lease.

Why should a nonprofit consider installing solar?

Installing solar with GRID Alternatives can reduce a nonprofit's operating costs, leaving more money for their mission. GRID makes the process easy and offers funding and financing resources specifically for nonprofits. All of their projects include deep community engagement and workforce development for local job trainees.

Can a nonprofit get a tax credit for solar?

Today, eligible nonprofits can receive a tax credit of 30% of the total solar installation cost despite not paying taxes. Eligible organizations include: Therefore, while PPAs and leases were the only options available today, another allows for direct ownership.
