

Does Nova Scotia need solar energy?

Nova Scotia aims for 80% renewable energy by 2030, with solar energy helping to reduce the province's 42% coal dependency for electricity generation. Each kilowatt of installed solar capacity in Nova Scotia generates about 1,090 kWh per year, with minimal energy loss (3%) due to snow and winter conditions.

How does solar work in Nova Scotia?

Solar photovoltaic systems convert the sun's energy into electricity, even on cloudy days, providing a sustainable power source for your home. 2. What financing options are available for solar installation in Nova Scotia? The Government of Nova Scotia provides clean energy financing through programs like Property Assessed Clean Energy (PACE).

What is Nova Scotia's solar energy program?

This program creates the opportunity to buy solar energy from a community provider instead," said Tory Rushton, Minister of Natural Resources and Renewables. "This is just one of the many changes we're making to give Nova Scotians clean, reliable power at affordable rates, while helping us reach our climate change goals."

Is solar a good investment in Nova Scotia?

Solar technology isn't dirt cheap, and governments realize that. By offering rebates, grants, or low-interest loans, officials encourage homeowners to embrace greener energy. In turn, Nova Scotia meets carbon reduction targets, lowers grid strain, and fosters a thriving local solar industry.

What is a solar garden in Nova Scotia?

A solar garden is a simple way for all Nova Scotians to have access to solar energy, without having to install their own panels. When customers subscribe to the solar garden, they're helping generate more clean energy that gets distributed across the grid, and they benefit by saving money on energy costs over time.

How much do solar panels cost in Nova Scotia?

Solar panels in Nova Scotia can save homeowners an average of \$1,300 annually on electricity bills, with the province ranking 6th in Canada for solar adoption. Installation costs for a 9.17 kW system average \$26,318, but rebates like the \$3,000 SolarHomes program and \$5,000 Greener Homes Grant reduce the final cost to \$18,318.

In the community of Elmsdale, Nova Scotia Power worked with customers and industry leaders to examine how battery technology and microgrids can help us better serve our customers. ...
