

Does New York have a solar system?

In New York, the sun shines for everyone. New York State is making solar energy more accessible to homes, businesses, and communities through NY-Sun incentives and a network of qualified installers.

Is New York a good state for solar energy?

Despite receiving less sunlight than much of the country, New York State is one of the leaders in residential solar adoption and ranks sixth for projected growth over the next 5 years. This is largely due to the state having some of the highest electricity prices and arguably the best solar incentives.

How many solar projects are there in New York?

New York is home to more than 800 community solar projects and leads the U.S. in community solar capacity. Statewide, New York's solar energy development is driving economic growth and employing more than 14,000 workers in a variety of solar energy careers.

What are the benefits of solar energy in New York?

With rooftop, ground-mounted, and community solar options available, all New Yorkers can access clean energy from the sun. Reduce your home's reliance on fossil fuels like oil, propane, or natural gas by choosing a cleaner, renewable source of electricity. Lower your monthly electric bill.

Is it a good time to go solar in New York?

New York State is making solar energy more accessible to homes, businesses, and communities through NY-Sun incentives and a network of qualified installers. Combined with declining equipment costs, New York State tax credits, and Inflation Reduction Act tax credits, there's never been a better time to go solar.
