

Who is origin solar?

Origin describes itself as your 'one-stop' solar system provider. It offers a range of services including the design, installation and maintenance of your solar system. Origin also has a range of electricity deals, including a few specialised solar products, to help customers get the most out of their panels.

Who is Origin Energy?

With an emphasis on tailored energy management, Origin empowers consumers to harness solar power seamlessly in their daily lives. Origin Energy's solar services encompass comprehensive packages that include the installation of high-efficiency photovoltaic panels, battery storage options, and maintenance support.

Does origin offer a solar energy deal?

Origin also has a range of electricity deals, including a few specialised solar products, to help customers get the most out of their panels. Most Origin electricity plans include a feed-in tariff, but these offers are specifically designed for solar customers and include the retailer's highest rates for exporting energy to the grid.

What if I switch to Origin Energy?

As discussed, customers that sign up to Origin's dedicated solar product can score an even larger FiT, upward of 10c/kWh. Solar customers that have previously signed up to a Solar Bonus Scheme tariff should still receive the bonus rate if they switch to Origin. Here is a list of all Origin Energy feed-in tariffs for solar customers.

Is origin a good solar company?

As Australia's biggest integrated energy company, Origin is well-placed to help you at any stage of your solar journey. But getting the best solar deal from Origin requires some commitment on your part, so you'll need to think carefully before making any big, long-term decisions.
