

How much do solar panels cost?

If you just need a few panels for a small do-it-yourself solar project, expect to pay around \$200 to \$350 per panel (between \$0.80 and \$1.40 per watt). We suggest using NREL's PVWatts Calculator for estimating your solar installation costs. First, consider your average household energy needs. This tells you how big of a system you need.

Where is the cost of solar panels the highest?

The cost of solar panels varies by state. While Arizona has the lowest average cost, Maine and New Hampshire have some of the highest prices. This trend is generally observed on EnergySage, with lower \$/W pricing in warmer states and higher \$/W pricing in colder states.

How much does a solar panel cost in New Mexico?

Our survey data also found that New Mexico has some of the cheapest solar panel costs in the U.S., with an average price of \$9,996 after using the federal solar tax credit. Solar panel pricing is the most expensive in Massachusetts, where estimated costs are around \$18,900 after the tax credit.

How much does solar energy cost per watt?

The cost per watt is what you pay for each unit of power of your solar energy system. Think of it a little like "price per square foot" when you buy a house. It helps compare the value of solar energy systems in different sizes. As of publishing, the average cost per watt is \$2.84.

What is the cost of solar panels in 2024?

The average cost of solar panels in 2024 is around \$20,948 for a 11 kW system after federal tax credits. This is based on thousands of quotes in the EnergySage Marketplace. Although this is a significant number, incentives usually lower it significantly.

How much does a 5 kilowatt solar system cost?

The average 5-kilowatt (kW) solar panel system is \$14,210 before considering any financial incentives. However, a typical American household needs a system closer to 10 kW to adequately power their home, which costs \$28,241 in 2024. That price effectively drops to \$19,873 after considering the full federal solar tax credit.

Performance: Solar panels with high power output or efficiency ratings often come at a higher price point because they can produce more energy. Premium efficiency solar panels can cost up to 25% more than standard efficiency ...

Solar panels cost from \$4,972 for a 4-panel package, while batteries start from \$3,057 if installed along with solar panels. Customers who installed their solar panels and/or battery through Scottish Power can take ...
