

How much solar power does India have?

As of June 2024, India's total installed solar capacity reached 87.2 GW, with utility-scale projects making up nearly 87% and rooftop solar accounting for over 13%. Solar energy now represents 19.5% of India's total power capacity and more than 44% of its renewable energy capacity.

Will India reach 100 GW solar energy capacity?

India reaches 100 GW solar energy capacity, marking a major milestone in renewable energy. Learn about key government schemes, rapid growth trends, and future targets for 2030.

What are the recent achievements of India in solar energy?

About Recent Achievements of India in Solar Energy: India achieved 100 GW of solar capacity as of January 2025, aiming for 500 GW of renewable energy by 2030. Solar energy now contributes 47% of total installed renewable capacity, showing its dominance in clean energy. A 3,450% increase in solar capacity from 2.82 GW in 2014 to 100 GW in 2025.

How many solar projects are there in India?

India's also witnessed growth in hybrid and round-the-clock (RTC) renewable energy projects. Projects generating 64.67 GW are under implementation and tendered, bringing the grand total of solar and hybrid projects to 296.59 GW. Solar power is energy from the Sun that is converted into thermal or electrical energy.

How much solar power does India have in 2025?

India has achieved a historic milestone by surpassing 100 GW of installed solar power capacity. As of January, 2025, India's total solar capacity installed stands at 100.33 GW with remarkable growth trajectory (see infographic). 84.10 GW is under implementation and an additional 47.49 GW under tendering.

How much solar power does India have in 2023?

This annual solar potential surpasses the collective energy output of all available fossil fuel reserves. In 2023, solar power comprised nearly 50 percent of India's renewable potential, marking a substantial shift toward a more sustainable and diverse energy mix.

CENTRAL ELECTRICITY AUTHORITY PAGE 2 Figure 3 Installed Capacity in India as on 31.03.2021
Figure 4: Source wise addition in RE Installed Capacity in March 21 ...

The Union Minister for New & Renewable Energy and Power has informed that as on 30.06.2023, a cumulative solar power capacity of 70,096 MW has been installed in the ...

India's solar industry is experiencing significant growth, with record installations of about 15 GW in the first half of 2024, as developers rushed to complete previously delayed ...

The Solar Energy Corporation of India (SECI) plays a key role as an implementer of renewable energy projects. SECI issues tenders for solar and wind projects and awards these to developers based on a tariff-ruled ...

The Parliamentary Standing Committee on Energy has raised several important questions in its second report on the Union Ministry of New and Renewable Energy's (MNRE) ...

India surpassed Germany in 2024 to become the world's third-largest wind and solar electricity producer, contributing 10% to global clean energy generation.

It includes Solar power: 85.47 GW, Large hydro power: 46.93 GW, Wind power: 46.66 GW, Biopower: 10.95 GW, Small hydropower: 5.00 GW, Waste to Energy: 0.60 GW. RE targets in India. India aims reaching a non ...

India has a huge potential for generation of renewable energy which stands at 21,09,655 MW as on 31-Mar-24. The potential of generating energy from Wind Power is ...

India achieved 100 GW of solar capacity as of January 2025, aiming for 500 GW of renewable energy by 2030. Solar energy now contributes 47% of total installed renewable capacity, showing its dominance in clean ...

*India was ranked fourth in wind power capacity and solar power capacity, and fourth in renewable energy installed capacity, as of 2023. * India surpasses the global average in setting and reducing carbon emission targets, ...

Rural areas have a bigger chance for solar energy (363 GW) than cities (274 GW). Fenice Energy helps with a wide range of clean energy solutions. They aim to boost the use of solar power in India with their services. India's ...

This marks a major shift in India's energy landscape, reflecting the country's growing reliance on cleaner, non-fossil fuel-based energy sources. A variety of renewable energy resources contribute to this impressive figure. ...

National Institute of Solar Energy; National Institute of Wind Energy; Public Sector Undertakings. Indian Renewable Energy Development Agency Limited (IREDA) Solar Energy ...

India's National Institute of Solar Energy estimates the country's solar capacity potential to be around 750 gigawatts. India is well on its way to a future powered by renewable ...

India added 16.4 GW of solar capacity in the first nine months (9M) of 2024, a 167% year-over-year (YoY) increase from 6.2 GW in 9M 2023, according to Mercom India Research's Q3 2024 India Solar Market ...

Solar energy now represents 19.5% of India's total power capacity and more than 44% of its renewable energy capacity. The average cost of large-scale solar projects has ...

India's energy landscape has undergone a vast transition, with the focus shifting towards renewable means in the era of sustainability. As the world repositions itself towards sustainability, India's renewable sector unleashes a new scope ...

As of 2023, India's 176 gigawatts of installed renewable energy capacity makes it the fourth-leading nation in renewable power capacity worldwide. Moreover, the Asian ...

India ranks fifth globally in installed power capacity, with 73 gigawatts (GW) of solar power capacity. Global solar generation in 2023 was more than six times larger than in ...

Solar power constitutes 18% of India's total installed electricity but only 6.66% of the power produced, highlighting a gap between capacity and actual output. Renewables, ...
