

What are solar post cap lights?

Solar post cap lights, like SunnyPark's, are lights designed to fit on top of 4x4 posts. They are powered by solar energy and come with LED bulbs that create a unique light display through their crackle-glass pattern.

What are Ultra Bright's solar post cap lights?

Ultra Bright's Solar Post Cap Lights are advanced, powerful, and robust solar lights offered in numerous sizes and colors to match your deck posts. Add extra lighting and elegance to steps, rails, fences or decks with hassle-free solar technology.

What are solar post lights?

The solar post lights from SIEDiNLAR, known for their dual colour mode, add versatility and style to any outdoor space. With four LED lamp beads, these lights provide enough brightness for post cap applications, making them both functional and decorative. They are energy-efficient, charging during the day and lighting up at night for 10-12 hours.

What is the range of brightness for solar post cap lights?

These lights can also vary in brightness from just 10 lumens to over 200 lumens. Keep in mind that this brightness rating only refers to a single light, so adding more lights to the deck or yard will increase the overall light.

Where is the solar panel located on solar post cap lights?

On solar post cap lights, the solar panel takes up the top half of the light. Honeycomb covers are used on these lights that attach to the side of the post or to the fence boards, having a quarter-circle appearance that directs light down and out to each side.

How many lumens does a solar post cap light produce?

The brightness of solar post cap lights is measured in lumens. Solar post cap lights can range in lumens from as low as 5 lumens to more than 200 lumens. The cost of the light typically increases with the number of lumens it can produce.
