

What are solar post lights?

The solar post lights from SIEDiNLAR, known for their dual colour mode, add versatility and style to any outdoor space. With four LED lamp beads, these lights provide enough brightness for post cap applications, making them both functional and decorative. They are energy-efficient, charging during the day and lighting up at night for 10-12 hours.

How to choose solar post lights?

While analyzing solar post lights, first factor to consider is to know its efficiency of illuminating the outdoors. You should choose a product that can illuminate wide area. Usually, brightness of lights is measured in lumens. Instead of considering number of LEDs, you should opt for lights with higher lumen count.

Are solar post lights energy-efficient?

Solar post lights, unlike traditional post lights, are energy-efficient. This is because they use the sun's power instead of electricity. Plus, solar lamp posts usually contain LEDs, which can provide extended illumination for many years. For these reasons, it's easy to see why this lighting source has become popular.

How to choose a solar-powered vintage post light?

There are two levels of brightness for you to pick from, low and high levels. Make sure that you fully charge the solar lighting units to enjoy long-lasting work time. Besides, this solar-powered vintage post light is wireless. This means you can set it up where you desire.

Why do you need a solar street post light?

The EZ anchor system is ideal because it keeps the light on the ground. The integrated indicator will point out when the post level is secure and balanced. Additionally, we find this kind of solar street post lights a great accessory for decorative outdoor illumination.
