

Will PG&E shut down a solar power plant in Nevada?

LAS VEGAS (KSNV) -- Two units at the massive solar power plant near Primm, Nevada will shut down in the coming years as a deal with a California utility winds down. NRG Energy and Pacific Gas and Electric Company, or PG&E, announced they finalized negotiations to terminate two long-term purchase power agreements from Ivanpah Solar Power Plant.

Why did PG&E close a solar plant near Primm?

LAS VEGAS, Nev. (FOX5) - The Pacific Gas and Electric Company (PG&E) announced it's terminating a contract that powers a massive solar plant in the Mohave Desert. The energy company said the decision to close the plant near Primm resulted from an audit of its portfolios.

What happened to Ivanpah solar power plant?

FILE: The Ivanpah Solar Power Plant is seen in this undated aerial photo. (KSNV) LAS VEGAS (KSNV) -- Two units at the massive solar power plant near Primm, Nevada will shut down in the coming years as a deal with a California utility winds down.

How do I get to Primm Valley solar farm?

There are two primary exits for viewing the solar farm: Exit 286 from Nipton Road. Exit 291 provides the best access, allowing a closer view of the facility. From here, visitors can head west near the Primm Valley Golf Club and take Colosseum Road, which turns into a dirt road, for a more interesting, up-close experience.

Did NRG and PG&E cancel Ivanpah solar power agreement?

NRG Energy and Pacific Gas and Electric Company, or PG&E, announced they finalized negotiations to terminate two long-term purchase power agreements from Ivanpah Solar Power Plant. Ivanpah Solar is a 386-megawatt concentrating solar power plant with three units that cover 3,500 acres on the California side of the Mojave Desert.

Where is the Ivanpah solar plant in Las Vegas?

Just 45 miles south of Las Vegas lies a glistening, pixelated maze with towers poking up from the center. The site may seem like an art installation, but it is actually a solar plant. The Ivanpah Solar Electric Generating System spans 3,500 acres and generates up to 400 megawatts of clean energy, which is enough power for 140,000 homes.
