How to use solar power for pond pumps?Natural Swimming Pond Start to Finishyoutube.comCan a solar powered pond pump power a pond filtration system?

The first major drawback is the lack of water flow and head height these kind of pumps can produce. Generally speaking,a "powerful" solar powered pump will be in the range of 100-200 GPH of water flow. This would not be sufficientin powering a pond filtration system,or as a main pump for a large water feature.

How does a solar pond pump work?

The Solar panel/s are placed in direct sunlight to operate the pump. The Solar Pond Pumps are available as a pump only (if you already have your own panels,etc) or with Solar Panel/s. Some of the kits are also available with or without a battery for night time use or overcast conditions. Save our planet,energy and money - use Solar Power!
