

What is a solar panel water pump battery backup?

A solar panel water pump battery backup is a system that stores extra power in batteries during the day. This allows the solar water pump to operate when the sun goes down, extending the time your solar pond pump works at night in your pond or water feature.

What is the solar battery back-up for solar fountain pump?

The solar battery back-up is designed specifically for solar fountain pumps. It can store solar energy for use day or night. The input power should be from a solar module or DC power supply with an output voltage of 18V. It has build-in functions of overcharging and over discharging protection.

How do I connect a solar water pump to a battery?

To connect a solar water pump to a battery, first connect the "Input" cable of the battery back-up to a solar module or a DC power supply, and tighten the protection screw if applicable. Then, insert the pump plug to the "Output" socket of the battery back-up, and also tighten the protection screw. Make sure to keep the solar water pump fully underwater when it operates.

What is the input power source for the battery back-up?

The input power for the battery back-up should be from a solar module or DC power supply with an output voltage of 18V. This special solar battery back-up is designed specifically for solar fountain pump and can store solar energy for day or night use.

How do I set up my solar water pump?

To set up your solar water pump, first insert the pump plug into the "Output" socket of the battery back-up and tighten the protection screw. Then, ensure the solar water pump is fully submerged underwater. Next, turn the On/Off switch on the battery to the ON position, which will cause the G-normal/R low status LED on the battery to show green and the solar pump to start operating.

How does the solar panel water pump operate at night?

If you want the pump to have longer operating time in the evenings or on cloudy days, then turn the On/Off switch. This battery backup allows the solar panel water pump Kits to operate when the sun goes down by storing extra power in the batteries during the day.
