

What is a solar power purchase agreement (PPA)?

A power purchase agreement (PPA) is a financing option for solar panel systems, similar to leasing or renting. In a PPA, a solar company or financier covers all the costs of buying solar equipment and installing it on your roof.

What is a Power Purchase Agreement (PPA)?

A power purchase agreement (PPA) is a financial agreement where a third party (like a solar company) owns and maintains the solar panel system on your property, and you agree to purchase the electricity generated by the system at a predetermined rate. Many homeowners looking for an easy, low-cost, maintenance-free way to install a solar panel system move forward with a PPA.

Who owns the solar equipment in a PPA?

In a Power Purchase Agreement (PPA), the PPA company is the equipment owner. They get the federal solar tax credit and state tax incentives for installing the system. You, as the homeowner, agree to purchase the electricity produced by the system at a predetermined rate.

Who covers the costs of buying solar equipment in a PPA?

In a power purchase agreement (PPA), a solar company or PPA financier covers all the costs of buying solar equipment and installing it on your roof. Financing a solar panel system with a PPA is similar to leasing or "renting" a solar panel system.

Should I buy a solar lease or a PPA?

When deciding between a solar lease and a Power Purchase Agreement (PPA), consider the following: With a solar lease or a solar loan, the monthly payments are typically fixed. However, if you own your solar panels, they may increase your property value, which a PPA may not provide and could even complicate selling your home.

Should I buy solar panels at the end of my PPA contract?

At the end of your PPA contract, you can choose to renew the agreement, have the system removed, or purchase the solar panels at fair market value. However, purchasing the system at the end of the contract would actually cost you more in the long run than if you had purchased a system to begin with.
