

What is a solar power purchase agreement (solar PPA)?

A solar power purchase agreement (solar PPA) is an arrangement where you contract with a solar developer who pays for, installs, and maintains a solar system on your property. The system could include ground-mounted, rooftop, or carport solar panels, and it could include an energy storage system.

What is a Power Purchase Agreement (PPA)?

A power purchase agreement (PPA) is a financial agreement where a third party (like a solar company) owns and maintains the solar panel system on your property, and you agree to purchase the electricity generated by the system at a predetermined rate. Many homeowners looking for an easy, low-cost, maintenance-free way to install a solar panel system move forward with a PPA.

Who pays for the solar system in a solar PPA?

With a solar power purchase agreement (solar PPA), you contract with a solar developer that pays for, installs, and maintains a solar system on your property. The system could include ground-mounted, rooftop, or carport solar panels (or any combination thereof), and it could include an energy storage system.

What financing options are available for solar panels?

Many \$0-down financing options are available for going solar, including ownership (i.e., solar loan) or third-party-owned (i.e., leases) solutions. Many homeowners looking for an easy, low-cost, maintenance-free way to install a solar panel system move forward with a power purchase agreement (PPA).

Should I buy solar panels at the end of my PPA contract?

At the end of your PPA contract, you can choose to renew the agreement, have the system removed, or purchase the solar panels at fair market value. However, purchasing the system at the end of the contract would actually cost you more in the long run than if you had purchased a system to begin with.

What is a solar PPA?

A solar Power Purchase Agreement (PPA) is a type of solar financing agreement. With a PPA, a homeowner does not have to pay for the upfront costs of a solar system. Instead, they enter a contract with a third-party owner or solar developer who will take care of the design, permitting, and installation of their solar panel system.
