

What is a solar power purchase agreement (PPA)?

A solar power purchase agreement (PPA) is a popular financing option for installing solar panels on your roof. With a PPA, you can install a home solar system with no upfront costs. Instead, you pay the solar company every month for every kilowatt-hour of solar energy the panels produce.

Is a solar power purchase agreement a good deal?

For many people, a solar power purchase agreement is a solid deal. A PPA allows homeowners without the financial means to outright purchase a solar system to still enjoy savings on their monthly energy bill.

What is a Power Purchase Agreement (PPA)?

A power purchase agreement (PPA) is a financial agreement where a third party (like a solar company) owns and maintains the solar panel system on your property, and you agree to purchase the electricity generated by the system at a predetermined rate. Many homeowners looking for an easy, low-cost, maintenance-free way to install a solar panel system move forward with a PPA.

Should I buy a solar lease or a PPA?

When deciding between a solar lease and a Power Purchase Agreement (PPA), consider the following: With a solar lease or a solar loan, the monthly payments are typically fixed. However, if you own your solar panels, they may increase your property value, which a PPA may not provide and could even complicate selling your home.

Is going solar with a PPA a good idea?

Going solar with a Power Purchase Agreement (PPA) has both advantages and disadvantages. One of the main pros is that most solar PPAs offer a \$0-down way to go solar, meaning you won't start paying until the solar panel system starts generating electricity for your home.

Should I buy solar panels at the end of my PPA contract?

At the end of your PPA contract, you can choose to renew the agreement, have the system removed, or purchase the solar panels at fair market value. However, purchasing the system at the end of the contract would actually cost you more in the long run than if you had purchased a system to begin with.

Key to any business project is the financial pros and cons; whether the project will be a net positive or negative for the business. Purchasing a solar energy system is no different; you must weigh the financial costs and ...
