Are solar panels worth it in Perth?

Though solar power systems are always worthwhile in Perth, the exact specifics of financial and environmental savings through solar power in Perth will depend on a number of factors, including energy consumption as well as the orientation, tilt and shading of your solar panels.

How do I buy or repair a solar PV system in Perth?

If you wish to purchase or repair a solar PV system or a solar hot water system in Perth, dial 1300 73 93 55 to get a quote or to schedule a free site assessment. It costs nothing to speak to one of our local solar energy specialists. If you're looking for a solar power system in Perth or Western Australia, you've come to the right place.

What makes Perth a good solar city?

Abundant Sunshine: Perth's high solar irradiance makes it one of Australia's top solar cities, ensuring optimal energy production for your solar panels. Rising Electricity Costs: As grid electricity prices continue to increase, solar power offers a way to take control of your energy expenses.

Which solar panels produce the most electricity in Perth?

Solar panels facing north will generally produce the highest electricity output in Perth. However, panels oriented east or west can also be effective, particularly if they better match your household's electricity usage patterns. East-facing panels generate more energy in the morning while west-facing panels produce more in the afternoon.
