

What are Queensland solar & battery rebates?

Solar rebates and incentives are designed to make clean energy more affordable for homeowners and businesses across the Sunshine State. In this guide, we'll break down what you need to know about Queensland solar & battery rebates in 2024.

Can Queensland residents get a solar rebate in 2024?

In 2024, Queensland residents can access the federal SRES rebate, which provides significant upfront savings on solar installations. The rebate amount varies based on system size and location.

What solar incentives are available in Queensland?

Currently, three solar incentives are available in Queensland: 1. The Small-Scale Renewable Energy Scheme 2. Queensland Battery Booster program 3. Solar feed-in tariffs 1. Small-scale Renewable Energy Scheme (SRES)

What is a solar energy rebate?

This rebate, often aimed at battery installations, helps residents combine solar panels with energy storage solutions. By providing financial assistance, the program allows homeowners to store excess solar energy, leading to greater energy independence and resilience against rising electricity prices.

How do I claim the Queensland solar rebate?

This amount can be claimed directly at the point of the sale price as a discount from your solar installer. The Queensland solar rebate is still available in 2025, so to take advantage, you must install your solar panel system by a Clean Energy Council (CEC) approved installer.

How can I save money on solar energy in Queensland?

Maximise your savings by using as much of your solar energy as possible during the day. Excess energy exported to the grid earns feed-in tariff credits but at a lower rate (typically 6-10 cents per kWh) than what you'd pay for grid electricity. Queensland's feed-in tariffs vary by electricity provider.
