

What is a solar lease?

Solar leases are very similar to power purchase agreements (PPAs). With both options, a solar developer installs and owns the solar panels on your roof. The two differ in how you pay for the solar energy. Solar lease payments are the same every month, whereas solar PPA payments are based on the amount of energy the panels actually produce.

How much does a solar lease cost?

Lease arrangements for solar panels vary widely, depending on the size of the solar system and who your installer is. (Again, think of the analogy of leasing a car.) Generally speaking, a solar lease will cost between \$100 and \$200 a month, according to Michaud. But the best way to know for sure is to get an estimate from a solar company.

Do you need a lease or power purchase agreement for solar panels?

A lease or power purchase agreement allows you to get solar panels with basically no upfront costs. Instead, you'll be on the hook for a monthly payment. Because you don't own the panels, you'll either have to transfer the lease to the new homeowner, or have the panels removed.

Do you have to pay a solar lease payment?

But, you'll still have to pay your solar lease payment. Usually, the lease payment will be lower than what your utility bill was before installing solar. So, if your electric bill is \$150 per month, and your lease payment is \$100, you're saving \$50 per month with a solar lease.

What is the difference between a solar lease and solar installer?

The installer is responsible for designing, installing, and maintaining the solar panels. Solar leases are very similar to power purchase agreements (PPAs). With both options, a solar developer installs and owns the solar panels on your roof. The two differ in how you pay for the solar energy.

How much does a solar system cost per watt?

According to 2022 data from research firm Wood Mackenzie, the average 8-kilowatt residential solar panel system cost about \$3 per watt. A 6-kilowatt sized solar system at this price per watt would equal roughly \$18,000 before incentives or rebates.
