

How can renters get solar panels for their home?

Renters can access solar at their home by installing a portable solar panel. These smaller, compact systems allow for self-sufficient energy generation in temporary locations, such as when camping, boating, or caravanning.

Are there any solar power options for renters?

There are some solar power options for renters, but they come with challenges. They are either difficult to obtain with the need for owner permission or expensive. In our case, we make extensive use of our solar battery and continue to strive for using less electricity from the grid.

Can a rental property benefit from a solar power system?

Under the 'Solar for rentals' program, property owners with rental properties in the Bundaberg, Gladstone and Townsville local government areas can work with their tenants to reap the benefits of having a solar power system.

Can a homeowner lease or rent a solar power system?

No, only the homeowner can enter an agreement to lease or rent a solar power system. Solar leases and rentals are designed to be long-term arrangements, so there's a big financial penalty for removing the solar panels before the contract term is up.

Can solar be installed on rental properties?

One new business, SunTenants, has partnered with Energy Matters to install solar on rental properties. SunTenants seeks to solve the split incentive problem by sharing the benefits of solar between tenant and landlord. Here's how it works:

Should you rent solar power equipment for your business?

Renting Solar Power equipment for businesses has several advantages. It conserves cash flow, so no Capex approval is required. Additionally, renting the equipment will appear as an operating expense on your Income Statement, not reflecting as an asset and thus improving equity ratio's.
