

How much solar power does Rhode Island have?

The current solar power generation in Rhode Island is about 42,000 MWh each year, which is only .05% of the state's energy needs--but it could be much greater. If all solar-viable rooftops were to go solar, power generation could increase to between 3,390 MW and 7,340 MW per year--enough electricity, possibly, to power every home in the Ocean State.

How many solar installers are there in Rhode Island?

There are only 11 local solar installers in Rhode Island, according to the Solar Energy Industries Association (SEIA), plus national companies that operate within the state as well.

Who are the best solar installers in Rhode Island?

Below are what we believe are the best solar installers in Rhode Island based on our research: In short, we suggest Rhode Islanders check out SunPower and Green Power Energy for their solar needs. Both providers include above-average customer service and high-quality systems that are sure to save you money over time.

Is Rhode Island a good place to convert to solar energy?

With its above-average electricity rates and its abundance of beneficial solar incentives, Rhode Island is one of the best places in the country to convert to solar energy. The average solar array in the state pays for itself in just eight years and saves an average of \$46,071 on energy bills thereafter in net savings.

How much do solar panels cost in Rhode Island?

Solar panels cost a lot to install, but they can save tons of money over time by shrinking or eliminating your electricity bills. The average Rhode Island homeowner needs a 9.54 kW solar panel system to cover their electricity needs, which comes out to \$31,869 before incentives. Prices range from \$27,089 to \$36,649 before incentives.

Can I install solar panels myself in Rhode Island?

Trying to install solar panels yourself can be dangerous, and incorrectly installing your panels could cause damage to both your equipment and roof. If you want to install a solar panel system in Rhode Island, you will need to apply for a solar permit through the Office of Energy Resources (EOR).
