What are people saying about solar installation services in Santa Cruz?

What are people saying about solar installation services in Santa Cruz, CA? "We were able to sneak in to NEM-2 and needed to delay installation until after the rainy season and a new roof. We were pleasantly surprised that Allterra was both patient with our nearly-a-year delay as well as extremely responsive when we were ready to move forward.

How much does solar cost in Santa Cruz?

The average price per watt of solar power in Santa Cruz, CA is \$2.36/W. These prices are before incentives. After the federal solar tax credit, the final cost will drop by 30%, down to \$11,960 for a 7.25 kW system. Many states even offer local rebates and incentives that lower the price further--sometimes by thousands of dollars.

Does Santa Cruz have a functional solar system?

Santa Cruz receives plenty of sunlight, which makes it a suitable location for a solar panel system. The federal solar investment tax credit allows you to lower your taxes by a percentage of the project cost.

Is solar a good investment for Santa Cruz residents?

Santa Cruz residents find solar installation a practical hedge against inflation, promising long-term financial benefits. The initial investment in solar power systems translates into significant savings as it circumvents the ever-increasing costs of traditional electricity.
