

Are solar panel scams common in Australia?

Solar panel scams are becoming increasingly common in Australia, with many homeowners and business owners falling victim to them. The scam usually involves a salesperson coming to your doorstep and offering you a free or heavily discounted solar panel system.

Are solar panels a scam?

The scam usually involves a salesperson coming to your doorstep and offering you a free or heavily discounted solar panel system. They may claim that the government is offering incentives for the installation of solar panels or that they have excess inventory that they need to get rid of.

Are solar panel door-to-door scams a growing problem in Australia?

Solar panel door-to-door scams are a growing problem in Australia, but by following the steps outlined in this guide, you can protect yourself from falling victim to these scams. Always do your research, get multiple quotes, read the contract carefully, and don't pay upfront.

How to protect yourself from solar panel scams?

To protect yourself from solar panel scams, you should take the following steps: Do your research: Before signing up for any solar panel system, research the provider online and check their reviews and ratings. Make sure they are a reputable company and have a track record of delivering high-quality installations.

Are solar telemarketing scams legit?

They often entice consumers with the allure of free solar systems or exaggerated rebate claims. Some scammers misuse telemarketing, a legal sales channel, to promote solar products. They may disregard the government's Do Not Call Register, which is a red flag for their legitimacy.

How do I report a solar panel scam?

Report the scam: Report the scam to the Australian Competition and Consumer Commission (ACCC) and your state's consumer protection agency. This can help prevent others from falling victim to the same scam. If you have been scammed by a solar panel provider, you should report it to the following agencies:
