Are solar panels worth it in Arizona?

For many homeowners, going solar is worth it in Arizona for the reduction in energy bills and reliance on local power companies. Over 25 years, Arizona homeowners with solar panels can save about \$59,661 in total utility power costs. A typical residential solar panel installation usually pays for itself within 7 years in Arizona.

Which solar companies are available in Arizona?

No current offers available. If you're going solar in Arizona, local solar companies like Sun Valley Solar Solutions and Verde Solar Power can provide a significant amount of value for residents, but the larger national companies service the entire state and have more resources for your installation.

Is solar a good investment in Arizona?

The state averages seven to eight peak sunlight hours per day, maximizing the amount of power produced by your solar energy system. Ultimately, going solar is a worthwhile investment in most states, but particularly in Arizona. **STILL NOT SURE?**

Should you choose a lower-efficiency solar panel in Arizona?

Arizona is one of the sunniest states in the country, which means most residents can get away with a panel with a lower efficiency rating and still eliminate or significantly reduce their energy bills. Choosing a lower-efficiency panel will still provide plenty of energy savings and boost sustainability but will cost less upfront.
