

Are solar panels tax deductible in South Carolina?

South Carolina offers several incentives to reduce solar panel system costs. Its state income tax rebate is one of the most generous in the country. The federal solar tax credit is available to solar owners nationwide. It provides a tax reduction equal to 30% of your solar installation costs. This credit can be applied once per system.

Are solar panels worth it in South Carolina?

Solar panels produce a little less energy per year in South Carolina than they do in the southwest United States, but that doesn't mean they're not still worth it. As long as you have a decent-sized roof that faces south, east, or west, you can absolutely make enough electricity from solar panels to meet your annual needs.

How much does solar cost in South Carolina?

Prices range from \$26,350 to \$35,650, but after the federal tax credit, that drops by 30%. While this may sound high, South Carolina has tremendous local incentive programs that bring down the cost of solar. That's why over 13,000 South Carolina homeowners have used EnergySage to receive and compare quotes for solar installations.

How many kWh does a solar system use in South Carolina?

Then, divide your annual kWh by 1,200 to find the system size you need. In South Carolina, the average home uses 12,936 kWh a year, which works out to an 11-kW system. Are solar panels worth it in South Carolina?

What is the South Carolina solar tax credit?

The South Carolina solar tax credit is currently worth 30% of the value of the solar system. It is claimed on your taxes in the year after installation. This is a federal tax credit, despite the common misconception that it is a state tax credit.
