How much does solar cost in Staten Island?

The average price per watt of solar power in Staten Island, NY is \$3.48/W. These prices are before incentives. After the federal solar tax credit, the final cost will drop by 30%, down to \$22,700 for a 9.31 kW system. Many states even offer local rebates and incentives that lower the price further--sometimes by thousands of dollars.

How does going solar impact the environment in Staten Island?

Going solar can have a meaningful effect on the environment. Many homeowners might be wondering how much exactly they can impact the environment by switching to solar in Staten Island, though. One thing that can drastically shape your carbon footprint is how long your commute is and how much you drive overall.

How much does electricity cost in Staten Island?

The residential electricity rate in Staten Island is \$0.1762 per kilowatt. Staten Island is one of many places in America experiencing a child care shortage, and areas on the north and south shores are considered child care deserts.

How do I know if a New York solar company is good?

Below are some of the criteria we examined specifically for New York solar companies: Brand reputation and certifications (20%): We take each company's Better Business Bureau (BBB) score into consideration, as well as how long the installer has been in business (at least 5 years is required, 10 preferred) and what type of solar certifications it holds.

Are solar panels a good investment?

Installing solar panels is an exciting home addition that many homeowners find beneficial for their wallets, communities, and the planet. On average, your family can save \$31,000 over 20 years after installing a solar panel system. And since solar panels last about 25 to 30 years, your total cost savings will be much higher than that overall.
