How many solar panels are there on the Sunshine Coast?

As of August 2019, there are more than 40,000 solar power installations on the Sunshine Coast, meaning a massive one in four homes on the Sunshine Coast are already covered in solar panels. The average solar system size on the Sunshine Coast is 4.0kW.

How much electricity does a solar system produce on the Sunshine Coast?

As the name suggests, solar power systems installed on the Sunny Coast will produce a decent amount of electricity - A typical 5kW solar power system installed here will generate an average of 22.97kWh of electricity per day - which is enough to power the average family home! Installing solar panels on the Sunshine Coast? Key benefits!

Should you invest in solar energy on the Sunshine Coast?

You may want to go green or cut your energy costs. The climate here on the Sunshine Coast is perfect for solar energy. However, investing in solar power requires various considerations: How many panels are necessary? What power level is optimal? What about cloudy days? Is a battery storage system crucial? And what's the expected payback period?

Is Queensland a good place to generate electricity with solar panels?

Much of Queensland is blessed with some of the world's finest sunshine resources. There is no greater example of this than the aptly-named Sunshine Coast region; a fantastic place to generate electricity with solar panels.

Why is the Sunshine Coast a good place for solar power?

The Sunshine Coast receives an average of around 6.2 hours of full sun per day, making it one of Australia's sunnier cities, as well as one of the best places to install solar PV.
