

What is the average cost of a solar system?

The average cost of a solar system purchased through solar.com is 6-8 cents per kWh. This varies depending on the size of the system, type of equipment, and local incentives.

How much does a home solar system cost?

According to the SEIA, home solar systems have an average price of \$3.24 per watt in the U.S. before incentives. Comparatively, our team found an average cost per watt of \$3.10 based on our survey responses. Note that system pricing can vary based on the solar panel and equipment brand, installer, location and more.

How much does it cost to install a solar panel?

(Mar 2025) Solar panels generate "free" electricity, but installing a system still costs money. A typical 8-kilowatt (kW) solar panel system costs \$22,712 before considering any financial incentives. Your energy needs determine the system size you need, which affects the overall price of your solar panel installation.

What is the cost of solar panels per square foot?

On average, solar panels cost \$8.77 per square foot of living space, after factoring in the 30% tax credit. However, the cost per square foot varies based on the size of the home. For example, the post-tax credit cost of solar panels for a 2,500-square-foot home is around \$20,000 for a rate of \$7.96 per square foot.

How much does a 1500 square foot Solar System cost?

The average solar system costs around \$27,500 before incentives, and around \$19,250 after the 30% tax credit for a 1,500 square foot house, according to a data analysis by Solar.com. That boils down to a rate of around \$12.80 per square foot of living space. Related reading: [How Many Solar Panels Do I Need for a 1,500 Square Foot Home?](#)

How much does a 5 kilowatt solar system cost?

The average 5-kilowatt (kW) solar panel system is \$14,210 before considering any financial incentives. However, a typical American household needs a system closer to 10 kW to adequately power their home, which costs \$28,241 in 2024. That price effectively drops to \$19,873 after considering the full federal solar tax credit.
