

Can solar power my entire house?

One of the most frequently asked questions by homeowners in regard to solar power is, "can it really power my entire house?" The answer to that is actually quite simple - yes, solar can indeed power your entire home. But explaining exactly how solar energy can power the entirety of your home is a little more complicated.

How does a solar energy system at home work? How Does Electricity Get to My Home? youtube.com Should you buy a solar-powered home?

Homes that are powered by low maintenance, renewable energy sources like solar or wind are in high demand, and prospective buyers are willing to shell out more money for them. One study conducted by the U.S. Department of Energy found that homebuyers are willing to spend an additional \$15,000 or more for a solar-powered home. 5.
