

How many solar installers are there in Vermont?

The Solar Energy Industries Association (SEIA) notes that there are 39 solar installation companies that are based in Vermont, plus national and regional installers that service the state. That means you'll have your work cut out for you if you want to choose the one that's best suited for your particular solar project and fits into your budget.

How much does a solar system cost in VT?

The per-watt price for solar equipment in VT is about \$0.26 higher than the national average, hovering around \$3.59. However, the energy needs in the state are so low that most residents only need a 6 kilowatt (kW) system to offset energy consumption. This is a significantly smaller system than what most Americans need -- 9 kW on average.

Which solar panels work best in VT?

A PV panel with a high efficiency can do just that and is most likely to offset the above-average energy prices in the area. Some brands that work well in VT include Maxeon, Tesla, REC, Qcells, Canadian Solar and Panasonic. Next, we suggest looking for a company that offers lengthy warranty coverage.

What are the best Solar Lease companies in Vermont?

Plus, SunPower guarantees the energy output from the system you lease, which is an additional protection that other companies don't always provide. Sunrun is another big name you'll likely come across when researching solar leases in Vermont.

Do I need a solar battery in Vermont?

No, you don't need to install a solar battery in Vermont. Solar panels can operate and lower your electricity bill even without a battery. However, a solar battery might be a worthwhile investment in some cases.

What should you look for in a solar system installation company?

The first things we look for in a solar system installation company in VT are the products it carries and the services it offers. As mentioned above, high-efficiency panels are a must-have in Vermont if you want to offset the high energy bills.
