

How much do solar panels cost in New Jersey?

Most New Jersey homeowners spend roughly \$23,590 on a home solar panel system, which comes out to \$16,513 after factoring in the 30% federal solar tax credit (ITC). These costs reflect the average solar panel system size of 7 kilowatts (kW), but you might be able to save money on solar panels if a smaller system could be installed on your home.

Is New Jersey a good place to install solar PV?

New Jersey is a national leader with regards to installed solar PV capacity, with more than 5 gigawatts (GW) from over 210,000 individual solar PV installations. New Jersey has an interactive Solar PV dashboard that provides a summary of solar PV installations in New Jersey's counties.

Is solar power a good choice in New Jersey?

Opting for solar power in New Jersey is an economically wise choice. Why? Well, for instance, a standard residential solar panel system in the state can produce approximately 1,200 to 1,500 kWh per year for every kilowatt (kW) of installed solar capacity. What does this mean? Take a 5-kW system which is a residential standard.
