

How much do solar panels cost in Colorado?

Solar panels will save you a lot of money over time, but the upfront costs aren't cheap. The average Colorado homeowner needs a 9.6 kW solar panel system to cover their electricity needs, which comes out to \$28,102 before incentives. Prices range from \$23,887 to \$32,317 before incentives.

What are the top solar companies in Colorado?

After researching dozens and dozens of Colorado solar installers, we've found the ones that are most likely to bring you the best quality and service possible. Overall, we recommend choosing SunPower or Blue Raven Solar for your solar needs in the Centennial State.

How much does a SunPower solar system cost in Colorado?

The upfront cost of installing a 10 kW SunPower solar system can cost between \$15,000 to \$20,000 in Colorado. SunPower also offers an outstanding 25-year warranty that covers both the solar panels and system workmanship. The company manufactures its own solar panels, which are among the most efficient solar modules in the industry.

Do solar panels pay off in Colorado?

Based on feedback from hundreds of solar customers in Colorado, the general consensus is that solar panel investments pay off over time. Assuming an upfront purchase, it takes about 9 years to break even (when your savings with solar panels make up for the cost). The average solar panel installation costs \$3.03 per watt in Colorado.

Can a solar contractor install solar panels in Colorado?

Yes, a solar contractor can install solar panels in Colorado. Some solar contractors only provide solar panel installation, while others are considered full-service solar installers.

How many solar installers are there in Colorado?

Colorado is home to over 180 solar installers, which is a testament to the high demand for solar equipment in the state. Unfortunately, where there is high demand, there are also less reputable companies that crop up just to turn a profit.
