

What does Virginia Energy do with solar energy?

The Virginia Energy supports solar energy projects that promote the broader use and application of solar technologies in the Commonwealth. On April 22, 2024, Virginia Energy received \$156 million for the Solar for All program through EPA's Greenhouse Gas Reduction Fund.

When did Virginia Energy receive funds for the Solar for All program?

On April 22, 2024, Virginia Energy received \$156 million for the Solar for All program through EPA's Greenhouse Gas Reduction Fund.

Are solar panels a good investment in Virginia?

Solar panels will save you a lot of money over time, but the upfront costs aren't cheap. The average Virginia homeowner needs a 12.82 kW solar panel system to cover their electricity needs, which comes out to \$36,980 before incentives.

How much does solar cost in Virginia?

Interested in going solar? You'll need to install a 12.82 kW solar panel system to cover the average electric bill in Virginia, which will cost you about \$25,886 after the federal tax credit. As long as your federal tax bill is high enough, you can take advantage of the federal investment tax credit (ITC).

How can Virginia energy help economically impacted communities?

Virginia Energy and partners are working with economically impacted communities across the state to measure their energy resilience and identify practical long-term solutions to reduce or eliminate vulnerabilities through a \$1 million US Department of Energy funded project. Interested in how this can benefit your community? [Learn More Here](#)
