

What is a solar-powered watch?

A solar power watch is a type of watch that converts light into energy using a small solar panel inside the watch. This technology offers several benefits, such as a longer battery life compared to traditional batteries, which can last about 10 years on average.

How do solar watches work?

Harnessing the power of light, solar watches convert both natural and artificial illumination into electrical energy through a photovoltaic cell beneath the dial. This energy gets stored in a rechargeable battery, typically made of lithium-ion or similar advanced materials, which can power the watch for months even in complete darkness.

Where do solar-powered watches come from?

The third widely available source of solar-powered watches comes from Casio. The brand has named the technology Tough Solar, implying the ultra-durable construction of Casio watches. The power reserve of Casio solar watches depends on the use of various functions, but it stays mostly around six months.

Which smartwatch is solar-powered?

The Garmin Fenix 7X Solar is a solar-powered smartwatch. It is the bigger version of the Garmin Fenix 7 Solar and comes with several added features, including a 1.4" solar-charged touch display.

Are solar-powered watches worth buying?

As more people embrace the power of solar watches, you can expect them to become more common. In the meantime, there are plenty of solar watches to choose from, including options from brands like Casio, Citizen, Seiko, and even TAG Heuer's new solar-powered Aquaracer.

Which brands offer solar-powered watches?
