

What is the SolarTherm solar water heating system?

SolarTherm solar water heating systems are designed and manufactured to optimise heat absorption and efficient heat transfer from solar collector to the water running in the copper riser tubes of the panel. Heated water is then transferred to the insulated hot water storage tank by using a forced circulation system.

Who is alpha solar energy systems (private) limited?

In 2003, Alpha Solar Energy Systems (Private) Limited was created as a sister company of Alpha Thermal Systems (Private) Limited to increase focus and improve customization of its solar photovoltaic (PV) activities.

How does the solar water heating system work?

SolarTherm solar water heating systems optimise the heat absorption and efficient heat transfer from solar collector to the water running in the copper riser tubes of the panel. Heated water is transferred to the insulated hot water storage tank by using a forced circulation system.
