

Does a solar pond aerator need a backup battery?

A solar-powered pond aerator relies on sunlight to function. Having a backup battery is recommended if you want to use your aerator 24/7. During daylight hours, the battery can be recharged.

How to choose a solar pond aerator?

When choosing a solar pond aerator, consider getting one with a backup battery. This is because the availability of sunlight limits the function of a solar-powered aerator. If you want to use your aerator 24/7, having a backup battery is recommended.

What is a Sear pond aerator?

The patented Sear® aerator for pond comes complete with a high efficiency solar panel, charge controller, battery back-up for running during nighttime hours, EcoFlow(TM) energy efficient compressor, high volume cooling fans, programmable digital timer and an adjustable aluminum manifold housed in an attractive, sound deadening cabinet.

How does a solar pond aerator work?

Increases Oxygen Levels: Aeration with a solar pond aerator also increases the amount of oxygen in your pond's water. Beneath the water surface, the air stone releases tiny bubbles of oxygen. They disperse and circulate throughout the water column, providing life-sustaining O₂ to beneficial bacteria, fish and submerged plants.

How many solar panels should a pond have?

Upgrading from two 100W solar panels to four 100W solar panels will extend hours of performance and improve performance during overcast days. A properly aerated pond can hold twice the amount of fish that a non-aerated pond could hold! Pond aeration is the process of mixing oxygen with your pond's water.

How long does a solar pond aerator typically last?

Solar pond aerators, like their electrical-powered counterparts, can last for a considerable duration. When used regularly, they can last for up to 10 years, and up to 15 years with casual use.
