## Solar powered shipping container

What is a 20 & 40 ft shipping container?

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank. Fully customizable to your exact needs. The durable container design is completely waterproof, protects you and your equipment from the elements and any potential security threats.

Can solar panels be placed on a container roof?

We love the strategically placed solar panels on top of the container roof - we've accomplished this secure mounting with our field tested RPS Scalable Ground Mount. Check out the Scalable Ground Mount page +manual. How will the container be delivered to my location?

How many watts can a 20 foot container grow?

For example, 20 foot containers can expand from 3,000W of solar up to 6,000W. 40 foot containers can expand from 3,000W up to 12,000W of solar in the future. We love the strategically placed solar panels on top of the container roof - we've accomplished this secure mounting with our field tested RPS Scalable Ground Mount.

Are shipping container offices eco-friendly?

Eco-Friendly Workspaces- Our shipping container offices are designed with sustainability in mind. We transform shipping containers into efficient, comfortable, and environmentally friendly workspaces. These offices are perfect for businesses looking to reduce their carbon footprint while enjoying the benefits of a mobile and versatile workspace.

Does stealth power offer solar?

Stealth power offers solutions whether you are looking to supplement your power usage with solar or looking to go fully off-grid. Stealth Power's solar optionsallow you to drastically reduce your monthly cost for electricity. Stealth Power's light, durable, and scalable options are installed by some of the top industry professionals.

How can a container office help reduce energy costs?

Emergency Response: Set up off-grid container offices as command centers during emergencies, ensuring essential services remain operational. Applying Thermoshield liquid thermal insulation significantly reduces energy consumption by minimizing heat loss in winter and heat gain in summer. This popular solution helps keep energy costs low.
