

What is a solar powered USB power supply & Charger?

A solar powered USB power supply and charger is a device that consists of a solar panel,a power converter, and USB cables. The power converter connects to the solar panel and reduces the voltage to a regulated 5 volt output suitable for powering and charging USB devices.

Can you build your own solar USB charger?

Building your own solar USB charger is easier than you might think. With just a few components and some simple tools, you can create a portable charging device that keeps your electronics powered up wherever you find sunshine. Whether for camping trips or as a backup during power outages, this DIY project puts power right in your hands.

What can a portable solar charger be used for?

Portable solar chargers enable you to work or play wherever you choose without worrying about access to electricity because the solar power bank stores solar energy. The solar power bank can be used for various purposes, including charging your phone.

What devices can a DC and solar USB charger charge?

Ideal for camping, backpacking, hiking, outdoor adventures and essential in any disaster, emergency and hurricane prep kit for survival. This DC and solar USB charger can charge a wide range of devices, including power stations and USB devices such as an iPhone, Samsung, Pixel, iPad, tablet, laptop, powerbank and more.

Can I use a 5~18V power supply instead of a USB?

Separate DC or Solar Input - Two pads on the edge can be used to connect a 5~18V power supply, which can be used instead of USB. If the input is a solar panel, the charging chip will adjust the current draw so that the voltage does not dip below the battery, thus optimizing the solar power input.

Is solar USB charging a good idea?

The cool thing about solar USB charging is that it's green energy - it doesn't hurt our planet. It's also free once you have the charger, and it lets you charge devices when there's no power socket around - like when you're camping or during a blackout. To make your own solar USB charger, you'll need some key parts:
