SOLARA POWER M-Series - High performance solar panels in the smallest of spaces
Appearance and design

What are the M Series solar panels suited for?

The M Series solar panels are perfectly suited for residential and commercial applications. These modules are the highest efficiency AC solar panels in the market, offered by SunPower, a leading company in the U.S. solar industry.

How does the Solara M-series work?

Easy installation & zero maintenance
The new Solara M-Series feature a very low profile waterproof junction box with 3 metres of cable. The panels feature a window adjacent to the junction box which can be drilled out. The cable is then passed through this hole and below decks beneath the panel.

Are M-series solar panels a good choice for marine applications?

The M-Series were specially developed for marine use not only on yachts but on buoys, life-rafts and marine industrial applications, they can definitely be considered tried and tested. Still manufactured in Germany and now with a 5 year guarantee. Thin, lightweight and rugged semi flexible marine solar panels.

Why are Solara M-series solar panels so popular?

Building on 20 years success with the original series, Solara has redesigned the M-Series for higher performance and a significant weight reduction without sacrificing the ruggedness and reliability which have made the panels among the most popular in the world. As used aboard KingFisher and many other boats in world class events.
