

What are SunPower M Series solar panels?

SunPower M Series solar panels are the result of cutting-edge technology, featuring Maxeon Gen 6 solar cells and a factory-integrated microinverter. Maxeon Gen 6 solar cells used for the M Series are designed to last longer and perform better, delivering more power during their lifetime.

What are the M Series solar panels suited for?

The M Series solar panels are perfectly suited for residential and commercial applications. These modules are the highest efficiency AC solar panels in the market, offered by SunPower, a leading company in the U.S. solar industry.

Why are Solara M-series solar panels so popular?

Building on 20 years success with the original series, Solara has redesigned the M-Series for higher performance and a significant weight reduction without sacrificing the ruggedness and reliability which have made the panels among the most popular in the world. As used aboard KingFisher and many other boats in world class events.

Are M-series solar panels a good choice for marine applications?

The M-Series were specially developed for marine use not only on yachts but on buoys, life-rafts and marine industrial applications, they can definitely be considered tried and tested. Still manufactured in Germany and now with a 5 year guarantee. Thin, lightweight and rugged semi flexible marine solar panels.

How does the Solara M-series work?

Easy installation & zero maintenance The new Solara M-Series feature a very low profile waterproof junction box with 3 metres of cable. The panels feature a window adjacent to the junction box which can be drilled out. The cable is then passed through this hole and below decks beneath the panel.

What are the best marine solar panels?

The Solara M-Series marine solar panels. Building on 20 years success with the original series, Solara has redesigned the M-Series for higher performance and a significant weight reduction without sacrificing the ruggedness and reliability which have made the panels among the most popular in the world.

Las nuevas Solara M-Series cuentan con una caja de conexi3n a prueba de agua y de muy bajo perfil con 3 metros de cable. Los paneles tiene una ventana transparente adyacente a la caja de conexiones para taladrar y pasar el cable bajo cubierta facilitando enormemente la instalaci3n.

Las nuevas placas solares marinas Solara Power M-series ofrecen un rendimiento incre3ble gracias a sus celdas solares monocristalinas de contacto trasero, Back-Contact, con una eficiencia del 22%.
