

Do I need a new SOLAS container weight verification?

The International Maritime Organization (IMO) has implemented a SOLAS amendment, or change to existing regulations, to require that containers and their contents must be weighed prior to loading. With up to 20% of TEUs shipped with an incorrect weight, the need for a revised SOLAS Container Weight Verification was clear.

How do you weigh a container under the SOLAS amendments?

Under the SOLAS amendments, there are two permissible methods for weighing: Method 1, which requires weighing the container after it has been packed, or Method 2, which requires weighing all the cargo and contents of the container and adding those weights to the container's tare weight as indicated on the door end of the container. 3.

Is a shipper's weight verification compliant with the SOLAS requirement?

However, it is important to note that, for the shipper's weight verification to be compliant with the SOLAS requirement, it must be "signed", meaning a specific person representing the shipper is named and identified as having verified the accuracy of the weight calculation on behalf of the shipper. 4

When will the SOLAS container weight verification Amendment come into effect?

National authorities must act urgently to outline their policies to implement the SOLAS container weight verification amendment. The rules are international law, therefore will automatically come into effect on 1 July, whether national authorities have taken action or not.

Does a packed container have a verified weight?

The International Maritime Organization (IMO) has amended the Safety of Life at Sea Convention (SOLAS) to require, as a condition for loading a packed container onto a ship for export, that the container has a verified weight. The shipper is responsible for the verification of the packed container's weight.

Who is responsible for verifying a packed container's weight?

The shipper is responsible for the verification of the packed container's weight. This requirement will become legally effective on July 1, 2016. After that date, it would be a violation of SOLAS to load a packed container onto a vessel if the vessel operator and marine terminal operator do not have a verified container weight.
