Solid containment panel solutions

What is a pultruded fiberglass containment system?

A pultruded fiberglass Containment System is a lightweight and high strength systemthat is much easier and more cost effective to installthan poured-in-place concrete or earthen containment alternatives. It can easily be installed in confined or remote areas and is removable if necessary.

Can a secondary containment system be installed in a confined area?

Each COMPOSOLITE ® Secondary Containment System can be easily installed in confined or remote areas.

Does cool shield offer flexible aisle containment panels?

Cool Shield offers both flexible aisle containment stripand containment panel solutions that comply with National Fire Protection Association (NFPA) 75 standards. Our standard polycarbonate and strip materials feature ASTM International E-84 Class A ratings. We also offer FM 4910-approved solid panels in clear and opaque finishes.

What is the standard wall height for a composite ® secondary containment system?

Each COMPOSOLITE ® Secondary Containment System is designed for your specific application and is shipped in kit form for field assembly. The standard wall heights are 24",30",and 36 inches(other heights available upon request).

What materials are included in a containment system?

A containment system includes COMPOSOLITE ® panels,with a maximum length of 24' and a weight of approximately 7.5 lbs/ft. for a standard panel. It also comes with cap channels with nylon rivets,which are furnished in 20' lengths for field cutting.

How do you design a server rack containment system?

Designing the proper containment system requires lining server racks in rows (or aisles) with the cold air intakes facing one direction and hot air exhaust facing the other. This makes one side of the row hot and the other side cold. The system is built around an CRAC (Computer room air conditioning unit) AC unit.

PALSUN® Solid Polycarbonate Sheet; ... Solutions > Containment Glazing; Bullet Resistant Polycarbonate Panels & Armored Glazing Solutions Ballistic bullet-proof polycarbonate sheets for multiple applications. Palram''s polycarbonate bullet ...

+ years of expertise in aluminum framing and custom manufacturing, Testrite delivers high-quality, cost-effective air containment solutions for data centers and critical environments. ...

The ceiling panel frames can be installed next, but do NOT install the Lexan panels yet. 6. Following the ceiling panels, install the power troughs and data center partitions. 7. Make sure the alignment of the racks and
