

How will the BMW Group work with Solid Power?

The BMW Group will work with Solid Power by having its personnel work hand-in-hand with Solid Power to optimize cell manufacturing processes prior to the installation of the BMW Group's prototype line. This collaboration is seen as a sign of both companies' belief in Solid Power's technology development and the value of solid-state batteries.

Is BMW working with solid power?

It's worth mentioning BMW isn't the only one working with Solid Power as Ford is also interested in acquiring the hugely promising technology for future EVs. BMW is building a prototype line for solid-state battery production in Parsdorf near Munich at the Cell Manufacturing Competence Center (CMCC).

When will Solid Power deliver cells to BMW?

As next step in the long term industrialisation time line, Solid Power plans to deliver full scale automotive cells to BMW Group for testing purposes in 2023. We look forward to working side-by-side with BMW's world-class battery team, said David Jansen, Interim CEO, President and Chair of Solid Power.

Will solid power and BMW Group develop a solid-state battery?

As a result of the expanded development agreement, both Solid Power and BMW Group intend to perform complementary cell development and manufacturing activities at their respective facilities to expedite the capability of the solid-state battery technology. Solid Power COO Dr. Derek Johnson spoke:

Is BMW developing a solid-state battery line?

BMW has obtained a research and development licence from the US company. Based on Solid Power's designs, it will build a prototype line for solid-state battery cells at its Cell Manufacturing Competence Centre in Parsdorf near Munich, Germany. Solid Power was founded in 2011 as a spin-off from the University of Colorado.

Why is BMW partnering with Solid Power?

"Expanding our relationship with BMW is further evidence that both companies believe in Solid Power's technology development and the value of solid-state batteries. We look forward to working side-by-side with BMW's world-class battery team," said David Jansen, Interim CEO, President and Chair of Solid Power.
