

How big should a waste container be?

Ideally, the size of the container should only be slightly bigger than the quantity of waste. It is not advisable to place incompatible waste in a single container and a supervisor must first approve the mixing of any materials. The type of waste must be compatible with the container's material itself to prevent corrosion and leakage.

How many yards of waste can a roll-off container hold?

Choosing the right size container to manage your waste is a good financial decision. Transporting 15 yards of waste in a 10-yard container can be expensive because the truck will need to make two rounds. Roll-off boxes typically come in 10, 20, 30 and 40-yard capacities. A 10-yard container typically holds 10 cubic yards of waste.

What are the typical dimensions of a bigger commercial dumpster?

This is a bigger commercial dumpster with dimensions that typically measure six feet in length and height. We can set up your rental agreement for multiple containers, with the freedom to mix and match dumpster sizes to get the right fit for your waste stream.

How much waste can a 10 yard container hold?

A 10-yard container typically holds 10 cubic yards of waste. The container's length, width and height are measured from the outside, giving a slightly higher than actual cubic yard capacity. Therefore, it is advisable to reduce 6 to 8 inches from the actual dimensions to ascertain the exact carrying capacity of the container.

How do I choose the right waste container?

When selecting the right container, the key points to remember are the size, material and design that suits the waste produced by your project. This will help you stay within legal compliance, as well as keep the expenses within budget.

What are the types of waste containers?

Types of Waste Containers Heavy industries such as construction and oil and gas produce large amounts of solid, liquid and gaseous waste, which could be hazardous. Demolition jobs and agricultural activities on the other hand produce non-hazardous waste. Choose the containers from the list below based on the application. Roll-off containers/boxes.
