Does Southern California Edison have a solar program?

Southern California Edison (SCE) has solar programs that can help you save money on energy bills, but they are set to expire soon.

How will Southern California Edison (SCE) ratepayers get electricity in 2022?

By Sam Wigness | Nov 11, 2022 Southern California Edison (SCE) ratepayers in Los Angeles County soon will have a different method of getting electricity -- from a new government-executed energy utility that guarantees lower bills amounts and simpler access to renewable-energy generation.

What incentives are available to reduce solar installation costs?

There are multiple incentive programs available to reduce the upfront costs associated with solar system installations. They are the: Disadvantaged communities (DAC) or disadvantaged communities Single-family Affordable Solar Homes (DAC\_SASH) programs. These programs provide free or discounted home solar systems to those who qualify.

Is SCE an alternative to Southern California Edison?

Homeowners and business owners will have the ability to remain with SCE or switch over to the county's brand new utility. "It's an alternative to Southern California Edison," remarked Supervisor Sheila Kuehl, who was one of the leads for the effort.

Does SoCal Edison still use SCE?

Electricity will still be sent via SCE through pre-existing power cables. SoCal Edison will additionally resume control of measuring the power usage with meters and deliver the bills to customers. The county-run utility, however, will purchase power from the market or under contracted agreement from producers.

Is there an alternative to Southern California Edison?

"It's an alternative to Southern California Edison," remarked Supervisor Sheila Kuehl, who was one of the leads for the effort. "Individual residences, individual businesses, every single person can join," Kuehl added when asked for comment.
