

How much does a SunPower solar panel cost?

On average, SunPower panels cost around \$4.00 per watt, which is well above the national average of \$3.33 and above the average for tier-one panels, which hovers around \$3.67. Of course, your total price for a SunPower solar power system depends on your energy needs, the size of your home, your location and more.

How much do solar panels cost?

When using SunPower panels, you can expect to pay around \$3.35 per watt, according to system pricing data gathered by EnergySage. However, you will get the most efficient solar panels in the industry for that extra investment: SunPower reaches 22.8% efficiency, followed by LG (22.3%) and REC (21.9%).

Who makes solar panels for SunPower?

Maxeon has been making solar panels for SunPower since its founding in 1985. In 2020, SunPower and Maxeon split into two separate public companies but still operate hand-in-hand. Maxeon handles most of the manufacturing end, while SunPower does the installations. Jamie is a Content Writer and researcher at SolarReviews.

Is SunPower a good solar panel brand?

Yes, absolutely. Overall, SunPower is the number one panel brand we recommend, and it's the one we'd be most comfortable installing on our own homes. SunPower panels are the most efficient in the industry.

Does SunPower offer direct solar panels?

SunPower no longer offers direct solar panel installations. In April 2024, SunPower ceased its home solar panel installation operations, so you cannot get solar panels installed directly by SunPower. However, the company is still managing its Dealer Network, meaning you can access SunPower financing plans and warranties through certified partners.

How much does a solar system cost per watt?

To calculate the cost per watt, take the total price and divide it by the DC watt size rating of the system. SunPower has installed thousands of PV systems. The average solar panel system from SunPower is 7,870 watts (7.9 kW) and costs \$36,300 for a price per watt of \$4.60. The expected cost per kilowatt hour (kWh) is \$0.17.
