

What is a Sungrow central inverter?

Sungrow central inverters come in power outputs ranging from 500 kW to 6.8 MW, suitable for utility-scale applications such as industrial facilities and commercial buildings.

What are Sungrow solar inverters?

Sungrow are a global inverter and storage manufacturer that offers a complete range of products for solar and storage projects in Australia and New Zealand. They manufacture a complete range of solar inverters and energy storage products for residential, commercial, industrial, and utility grade solar projects.

What is a good voltage range for a Sungrow inverter?

It is worth noting the rates included on the data sheet are the European weighted efficiency rates. The inverters' 16 A input current and 25 A short circuit current should satisfy most residential installations while the start-up and MPPT voltage range (180 v - 1000 v) is notable with Sungrow indicating it will translate to higher system yield.

What services does Sungrow offer?

In addition to our industry-leading PV inverters and battery energy storage systems, Sungrow offers a complete range of solutions to support the operation and maintenance of these components, all within your budget.

How do I contact Sungrow?

CONTACT US No matter where you are, our service staff is here for you. CONTACT FORM Phone: 400 119 7799 Mail: info@sungrow.cn HOME

FLEXIBILITY Supports 1-4 modules parallel (20.48 kWh) No need a junction box for expansion EASY INSTALLATION Slim design with a depth of only 182mm Plug and play design ...
